05/2018 - 05/2022

B.Tech , Information Technology (7.80 CGPA)

Senior Secondary

St. Francis School(C.B.S.E),Pithampur

05/2016 - 05/2017, PCM, 81.2%

PROJECTS

1. Web-Browser embedded with Face Mask Detection (2021 - Present)

- **Primary objective:-** To prognosticate whether a person is wearing a mask or not, on that basis the web browser will function.
- **Solution:-** We Created a Facial recognition-based Web Browser system. Also, Built the entire system on Keras, Numpy, TensorFlow,some other python libraries and Django. The system automates the task of identifying whether a person is wearing mask,if not then the web browser will shut down automatically.
- link for web browser(without face mask) : aaam.netlify.com

2. Bharatstaffing : Job Portal for unskilled labours (2020 - Present)

- **Primary objective:-** To bring the companies and unskilled labours together at same platform.
- **Solution :-** It's my small startup idea project I have been working on since 2020, In which I am trying to create a platform where unskilled labours can find a suitable job for them.It's a unique platform for unorganized sector worker
- Link of the project : bharatstaffing.com

3. Audio book using python and its libraries (2021)

- Created a small .exe file which can work as audio book and read pdf files

WORK EXPERIENCE
